Location location location! These interesting properties were created from the conversion of a 19th century gentleman's residence built into the cliff in the heart of 'old' Grange. In the early 1800s when Rockdene was built the waters of Morecambe Bay lapped the garden wall and the wow factor still exists at delightful Dolphin Cottage with its picture windows and private balcony affording breathtaking 180o views across the waters of the Bay to the Lakeland fells.
